

# The definitive guide to alternative water sources and wastewater solutions

This timely volume discusses alternative water sources and waste disposal methods that are appropriate when traditional means and methods do not exist or are inadequate. A variety of innovative concepts that are being researched, developed, and implemented worldwide are presented. Featuring detailed illustrations, an eight-page color insert, and current examples, this book provides the vital information needed to address the rapidly increasing global demand for clean water.

E. W. "Bob" Boulware is a registered professional engineer and President of Design-Aire Engineering. He is past national president of the American Rainwater Catchment Systems Association (ARCSA.org) and an Accredited Rainwater Systems Design Professional.
